

The CSS Series tools are coaxial cable strippers specifically designed to strip a stub end of a coax cable in a wall outlet box, which eliminates the need to run new cable, saving time and money. Each strips RG-59 and RG-6 cables to specific braid and center conductor lengths shown in chart below. The built-in strip stop insures the strip lengths are consistent. VELCRO® strip on bottom of tool is used to fold back braid on cable after being stripped.

#### Easy to use:

Insert cable, rotate like a screwdriver and remove. Tool will not cut the braid or score the center conductor.

Blade cartridges are interchangeable and easily replaced.
